

TASHEANA BYTHEWOOD

BUSINESS ANALYSIS | CUSTOMER EXPERIENCE | PRODUCT & PROCESS IMPROVEMENT

Cincinnati, OH | 614-483-9416 | bythewoodt@gmail.com

PROFESSIONAL SUMMARY

Business analysis and operations professional with more than five years of management experience improving learner admissions journeys, digital workflows, and service delivery. Translates business problem statements into documented requirements, process improvements, and reporting solutions. Experienced prioritizing initiatives, coordinating with technical and nontechnical stakeholders, and using performance metrics to guide decisions. MS in Analytics candidate at LSU, 4.0 GPA, expected December 2026.

CORE SKILLS

Business analysis • Business problem statements • Requirements clarification • Customer experience improvement • Initiative prioritization • Performance metrics • Implementation planning • Stakeholder communication • Cross-functional collaboration • Problem solving • Time management

PROFESSIONAL EXPERIENCE

Per Scholas

Columbus, OH

Senior Manager, National Admissions

Feb 2025 - Sep 2026

Customized & National Remote Delivery

- Translated business problem statements and stakeholder needs into requirements and documented workflows for learner admissions, coordinating with technical partners on system and process improvements.
- Led cross-functional alignment to clarify user needs, forms, eligibility, data sharing, reporting needs, and Salesforce requirements across customized partnerships.
- Created a group interview policy and Salesforce-integrated admissions process; developed staff guidance to communicate process changes and support consistent end-user adoption in collaboration with the IT/IS team.
- Troubleshooted Salesforce reporting and submission issues and FormAssembly record errors; documented issues, corrected records, and escalated persistent problems to system administrators.
- Used performance data and stakeholder input to identify bottlenecks, prioritize improvements, and communicate recommendations to senior management while balancing multiple workstreams and deadlines.

Manager, National Recruitment & Admissions

Aug 2021 - Feb 2025

- Built Salesforce and HubSpot automation workflows that reduced manual errors by approximately 75% and improved process consistency.
- Identified stakeholder reporting needs; developed dashboards and trackers using SQL, R, Salesforce, HubSpot, and Google Sheets to support enrollment forecasting, KPI monitoring, and data-informed prioritization.
- Managed customized admissions operations for 100+ cohorts and 5+ enterprise clients, translating hiring needs into learner recruitment and admissions plans.
- Partnered with implementation teams and executive stakeholders on onboarding, reporting, and process improvements across more than 22 campuses; managed and coached direct reports.

ADDITIONAL EXPERIENCE

TELUS International AI Data Solutions

Remote

Data Analyst

Aug 2023 - Aug 2024

- Evaluated digital-mapping datasets used in AI-enabled technologies, applying research protocols to identify inconsistencies and validate outputs.
- Worked independently to meet accuracy and usability standards for digital user experiences.

SELECTED PRODUCT AND ANALYTICS EXPERIENCE

Customized Partnership Launch Readiness | Per Scholas

- Developed an implementation and launch-readiness structure covering learner admissions, enrollment agreements, eligibility, technology access, reporting needs, and stakeholder communication.
- Documented cross-system coordination needs involving Salesforce, Smartsheet, and HubSpot, along with launch sign-off and post-launch review steps.

Reusable AI Instruction Framework | Personal Project

- Developed and refined reusable AI instructions defining user goals, task scope, output requirements, and evidence checks for analytical and professional tasks.
- Specified review steps for calculations, assumptions, and generated outputs; adapted instructions to project needs and platform constraints.

Inventory Risk & Product Configuration Optimization

LSU Analytics Practicum | Stuller Inc.

- Used SQL, Python, and Hex to analyze approximately 359,000 configurable ring combinations and evaluate product performance, inventory risk, and profitability.
- Presented recommendations explaining made-to-order versus in-stock tradeoffs to client and academic stakeholders, linking analysis to business decisions.

TECHNOLOGY

Business Platforms: Salesforce, HubSpot, FormAssembly, Smartsheet, Microsoft Teams

Reporting and Analytics: SQL, Python, R, Excel, Google Sheets, Power BI, Tableau, Hex, JMP

Generative AI: Structured prompting, reusable project instructions, AI-assisted analysis and debugging, evidence and uncertainty checks

EDUCATION

Louisiana State University

Expected Dec 2026

Master of Science in Analytics | GPA: 4.0

Graduate Certificate in Data Analytics | 2025

Miami University

May 2019

Bachelor of Arts in Classical Humanities
